

Does your venue outsource ticket printing? Would it be faster and more cost-effective to print tickets in-house? Vtix Solutions Corp. has the answer!

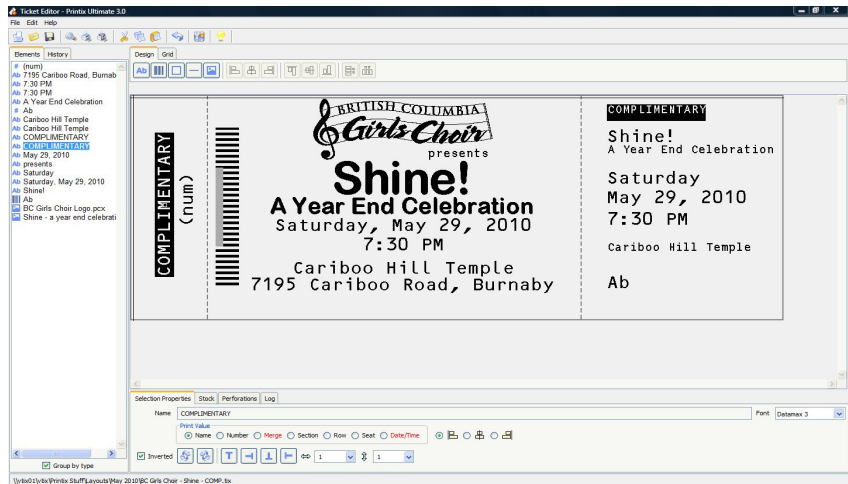

Introducing ⇨ **Printix Plus**

The fast, easy to use ticket printing system for your box office.

The **Printix Plus** application will assist any organization or venue that wants the speed and convenience of printing event tickets on site. All you need is our **Printix Plus** software and a compatible thermal ticket printer and you can be printing professional quality general admission tickets to your next event.

The **Printix Plus** Ticket Layout Editor has a set of powerful tools that enable you to input event information on the front of your ticket and even graphics or logos. You can also set basic parameters like the total number of tickets to print, starting ticket number and print order. It's simple to learn and use, and ultra convenient.

- Print an unlimited number of tickets per event.
- Track layouts by venue.
- Save layouts for future use.
- Tickets print up to 4" per second on generic thermal ticket stock available from Vtix.
- Select the printer font and then set the horizontal and vertical stretch factor.
- Add graphics, boxes, lines and bar codes.
- Invert or rotate text in any direction.
- WYSIWYG printing
- Sequential numbering

Perfect for venues ticketing general admission functions, such as night clubs, bars, community centers, schools, festivals, fundraisers and other entertainment and sporting events.

If you print in excess of 8,000 tickets per year, Vtix can provide your own custom thermal stock as well. Have your colour logo printed on the front of the ticket and sell the back to advertisers or sponsors.

Do you also need to print tickets with assigned seating information like section, row and seat? Ask us about our **Printix Pro** version.

Practical ITL Thermal Ticket Printer
