

If you are considering the purchase any of the Printix applications or are a current user of Printix Basic or Plus, you may also have a requirement to print tickets with assigned seating information. Vtix has the solution!

Introducing ⇨ **Printix Pro**

[The powerful, flexible ticket printing utility with reserved seating.](#)

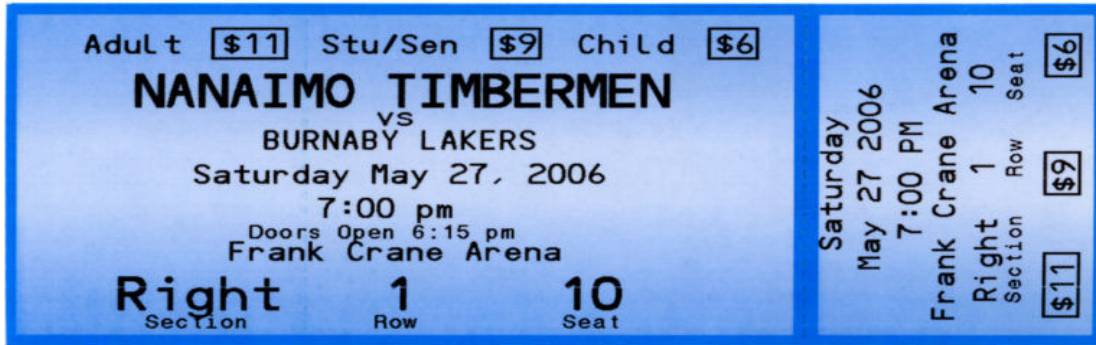

With the Facility Section Editor in **Printix Pro**, you now have the ability to construct a seating chart for your venue and print tickets containing the specific section/row/seat information. All you need is our **Printix Pro** software and a Practical thermal ticket printer (or other compatible thermal ticket printer) and you can be printing professional quality tickets (either general admission or reserved seating) to your next event.

The **Printix Pro** Facility Section Editor has a set of powerful tools that enable you to quickly and easily build an overhead view of each section in your facility. When this process is completed, you can choose to print tickets by individual seat, row, section or entire facility.

It's simple to learn and use, and ultra convenient.

- Add seats, rows or block with pre-defined naming conventions.
- Use flexible tools to align and distribute seats.
- Multiple selection tool for group editing.
- Copy and paste sections with similar seating arrangements.
- Create sections up to 100 rows by 100 seats.
- Zoom in or out for detailed design.
- Easily identify orphan, duplicate and selected seats.
- Print by seat, row or section in ascending or descending order.
- Print preview or print a graphical representation on a laser printer.
- Save seating layouts for future use.

Actual ticket printed from Printix Plus using the above facility map.

Perfect for venues ticketing general admission and/or reserved seating functions, such as school drama departments, college/university athletics, festivals, arts organizations and other entertainment and sporting events.

If you print in excess of 8,000 tickets per year, you can use your own custom thermal stock as well. Have your colour logo printed on the front of the ticket and sell the back to advertisers or sponsors. This is an incredible opportunity to offset the cost of your stock and create additional revenue for your organization.

Compatible with a Datamax ST3210C or Practical ITX series printers.

Practical ITX Series Thermal Ticket Printer

Cost: \$1,045.00

Software only. Not including applicable taxes.
